Notice of Joint Agency Workshop on Climate Adaptation and Resiliency

The California Energy Commission will conduct a workshop with the California Public Utilities Commission (CPUC), the California Natural Resources Agency, the Governor's Office of Planning and Research, and the Governor's Office of Emergency Services to discuss changes in the risk of wildfire due to climate change in California and how the energy sector can prepare. The workshop is part of the *2018 Integrated Energy Policy Report Update (IEPR)* proceeding.

Commissioner David Hochschild is the Lead Commissioner for the *2018 IEPR Update*. Energy Commission Chair Robert B. Weisenmiller is Lead Commissioner for climate change issues. A quorum of commissioners may attend, but no votes will be taken.

Background

California is an international leader in advancing solutions to climate change and forward looking energy policies. On September 8, 2016, Governor Edmund G. Brown Jr. committed the state to reducing greenhouse gases by signing Senate Bill 32 (Pavley, Chapter 249, Statutes of 2016). The statute sets a statewide goal to reduce California's greenhouse gas emissions 40 percent below 1990 levels by 2030. A companion bill, Assembly Bill 197 (Garcia, Chapter 250, Statutes of 2016), ensures that the state's implementation of its climate change policies is transparent and equitable, with the benefits reaching disadvantaged communities.

The *2018 IEPR Update* scoping order identifies the topics to be addressed. The scoping order states Volume 2 of the *2018 IEPR Update* will provide updated analysis of issues raised in the *2017 IEPR*, including "advancing Governor Brown's call to expand state adaptation activities through Executive Order B-30-15, with the goal of making the consideration of climate change a

routine part of planning” as well as “enhancing the resiliency of the electricity system while integrating increasing amounts of renewable energy.”

Agenda

The workshop will include presentations and discussion of work underway and next steps to make climate change a routine part of planning in California, with a focus on wildfire and the energy sector. In the morning, Energy Commission staff will provide an update of climate science related to wildfire and an update of technologies to help prevent potential wildfire ignition sources. Also, a panel will discuss incorporating the impact of climate change on wildfire risk into planning for natural and working lands. In the afternoon, CPUC staff will provide an update of climate adaptation regulations and processes related to wildfire. The afternoon will include panel discussions on climate change impacts on wildfire-related risks for vulnerable populations, critical facilities, and energy infrastructure.

A detailed meeting schedule will be posted prior to the workshop at http://www.energy.ca.gov/2018_energypolicy/.

Public Comment

Oral Comments: Commissioners will accept oral comments at the end of the workshop. Public comments may be limited to three minutes or less per speaker and to one person per organization. Any comments will become part of the public record in this proceeding.
